SONAR 2017.10 Update: Fixes and Enhancements

Last updated on 10/26/2017

The SONAR 2017.10 update includes the following:
- Big Fish Audio Loop Content
- New Overange Amp & 2x12 British State Cab for TH3 Cakewalk
- 30th Anniversary Anderton Collection FX Chains
- Fixes & Enhancements

How to Download the SONAR 2017.10 Update

1. Open Cakewalk Command Center. If you don't have the latest installer, Command Center will prompt you to download and install it. Cakewalk highly recommends that you do this. (Also remember that you can always download the latest version from the Cakewalk Command Center page.)
2. Update **SONAR Core** by selecting SONAR Platinum/Professional/Artist, then clicking **Install**.

Big Fish Audio Loop Library

Platinum, Professional, and Artist

Cakewalk has joined forces with Big Fish Audio to provide all SONAR customers with a truly amazing array of loop content in the form of construction kits that will help you kick start any musical project. All SONAR customers now get 5GB of premium loops from one of the best curators of loop content in the business. These are split into popular genres for easy downloading of whatever you need when you need it. We'll be featuring more of Big Fish Audio's stunning content in the Cakewalk store, so stay tuned.

Big Fish - Cinematic Loop Collection: From ambient guitars to cinematic percussion and soundbeds, these libraries provide atmospheres, deeply processed leads, arpeggiated swells, drones, mixes of percussive and melodic elements, chimes, noise, and other innovative loops. These sounds are ideal for today's film and TV industry soundtracks, cutting-edge sound design, chill and ambient music, or adding unique touches to any kind of contemporary styles including EDM and rock.

Big Fish - Country Loop Collection: Whether you want old-timey music like bluegrass, western swing, and traditional country loops or the fresh, new face of modern country that has earned its place in today's pop charts, these libraries deliver. You'll also find neo-folk that provides the distinctive, roots-oriented sound of Americana, along with acoustic guitar and mandolin loops with intros and endings, verses, choruses, bridges, chord libraries, and more to provide a wide variety of creative options in your productions.

Big Fish - Electro Pop Loop Collection: These libraries provide extra flexibility for all flavors of EDM by providing the stems for drum loops (snare, kick, hi-hat, etc. loops) along with the individual hits needed to create your own drum loops. Choose from fat drums, sick drops, soaring synth leads, builds, basses, synth leads, pads, percussion, FX, chords, melody lines, and more—all cut into sections for easy arranging, and stylistically similar to the chart-topping music of artists like David Guetta and Skrillex.

Big Fish - Rock & Pop Rock Loop Collection: Whether you need an indie rock groove to kick start a song or a pop-rock guitar lick to add some attitude

to your next hit, these loops excel for songwriting, trailers, commercials, sound design, and television. Instruments include 12-string, electric, and acoustic guitars along with drums, bass, mandolins, and percussion (which is suitable for all kinds of music, not just rock).

Big Fish - Urban Loop Collection: From the hard-hitting, hip-hop club vibe, to the laid-back R&B feel, to the speaker-destroying 808s and sinister leads of Trap, these loops cover the latest in musical styles. In addition to folders with loops, many construction kits also feature drum track stems, individual drum hits to make your own loops, and even MIDI files for total control over each track's melodic content when using your own virtual instruments.

Breakdown of included Content: 5.3 GB

- Cinematic
  - Eclipse 2 (500 MB)

  - Trap Bangerz (164 MB)

New Overange Amp & 2x12 British State Cab for TH3 Cakewalk

Platinum, Professional, and Artist

There is a brand new amp and cab added now to TH3 Cakewalk Edition. In the 2017.10 update of SONAR, you now get the Overange 120 amp modeled after the Orange Graphic 120 mkII and the 2x12 British State (UK) based on the Marshall Valvestate. This magic little combo is just what you need to find the gritty or vintage tone you are looking for and in the perfect colors to match the season

30th Anniversary Anderton Collection FX Chains

Platinum, Professional, and Artist

These FX Chains are Craig Anderton's latest versions of his go to signal flows that he uses in his productions. Some of these FX Chains are updates of processors included in previous releases. Some were introduced in the "Friday's Tip of the Week" thread in the SONAR forums, but as "do it yourself"

projects with instrucons on how to assign the controls—now they're convenient downloads. We hope you enjoy what these processors can do to help take your projects to the next level—download them, play with them, and have fun!

Fixes and Enhancements

Platinum, Professional, and Artist

Control Bar

- Selection Module no longer selects nothing in some situations
- Selection Module fails to update as expected in some cases
- Snap setting "Measure" not working When Snap Module set to Small

Duplicate

- Creating Repetitions of SIT with Duplicate Track yields unexpected results
- Undoing a Duplicate Track did not undo completely in some situations
- Duplicate Track no longer causes external MIDI inputs to transpose unexpectedly

Touch

- Touching Time Ruler no longer unexpectedly selects all Tracks
- Double Tap with Touch now works as expected to reset a control
- Selecting tracks is now possible with Touch
- Selecting a time range on ruler in TV with Touch now works as expected

Track View

- CTRL Drag Copy always pastes automation
- Clicking a Bus Name should set it to be focused
- Inconsistent composite clip display when take lanes are open
- Split Tool didn't always split grouped clips in take lanes
- Split Tool didn't create desired selection groups
- Transport jumps to end of clip after punch in recording
- Parameter values in tooltip while dragging multiple envelope nodes works more predictably

Start Screen

- Save dialog is sometimes captured in project thumbnails
- Snap/Aim Assist does not show in TV Bus Pane
- SONAR no longer requires project name dialog when creating project from Start Screen

Stability

- Resolved a crash that could occur when incorrectly trying to map a VST2 to VST3 plug-in

Surface Dial

- Improved horizontal scrolling in Staff View
- Improved scrolling in Step Sequencer
- Surface Dial failed to zoom properly in some views

MISC

- Nudge in the Piano Roll view could cause notes to disappear unexpectedly in some situations (FIXED AFTER EARLY ACCESS)
- Edit Filters showed incorrect parameter name after renaming an FX Chain or one of its controls
- FX Chains no longer appear available in Recent FX List within FX Chain
- Recent FX list now works in Clip FX Bin
- Recent FX list now works FX Chains
- Replace Synth now works properly from the Synth Rack menu when picking a recent synth
- Loop Construction View failed to scroll with wheel
- TH3 Full version could incorrectly assign automation or FX Chain parameters when upgrading from TH3 Cakewalk
